UNATTENDED WEIGHING KIOSKS

Unattended Weighing Kiosks (UWKs) were designed to provide drivers with a fully self-service truck-weighing process. These kiosks boost efficiency by streamlining and accelerating the weighing transaction procedure, dramatically reducing any unnecessary loss of time. They also do not require attendants or operators to process transactions, and are available for use 24/7/365.

Some of the key transactional information that UWKs can capture, include:

- Product ID
- Product Name
- Job number, purchase order
- Project name
- Descriptions
- Dump, haul, or delivery locations
- Hauler Name
- Truck ID
- ...and much more

By utilizing SWSCALE for your Unattended Weighing Kiosk needs, you'll not only be in the hands of our excellent service team, but you'll also have access to a suite of conveniences and perks that come with our UWKs, including some that are unique to our operation:

- Thoroughly customizable software
- Touch-screen capabilities
- Wireless technology
- Camera functionality
- Traffic control
- Solar power flexibility
- Signature capturing
- Ticket printing
- Connection capability via smartphone, tablet or Windows computer
- Remote support
- Intercom/VOIP communications
- Card/tag reader accessibility
- ...and a whole lot more
